July 10, 2023: 11:00-12:00 p.m. (ET)

The purposes of the meeting will be to discuss a path for PrP-lowering divalent siRNA 2439-exNA for a small investigator-initiated trial in symptomatic patients with prion disease.

Please find enclosed our formal request for a Pre-IND meeting and a completed FDA form 1571 as well as the full meeting package.

If you have any questions regarding this submission, please contact myself at [redacted] or [redacted]. Co-investigator Eric Minikel can act on my behalf on any issue relating to this pre-IND package.

We seek to identify a path forward to a small investigator-initiated trial of 2439-exNA in symptomatic patients diagnosed with prion disease.

6. **A list of the specific objectives/outcomes expected from the meeting:**

Concurrence on high-level clinical plan focused on symptomatic patients.
Concurrence on CMC and testing requirements for this clinical plan.
Concurrence on nonclinical studies required for this clinical plan.

7. **A preliminary proposed agenda:**

Discussion of questions to the agency and any other input from agency	Sonia Vallabh and Eric Minikel	40 minutes
Summary and action items	Sonia Vallabh	10 minutes

8. A draft list of specific questions:

1. [Clinical] We propose to test a single dose in symptomatic patients, escalating dose after an independent committee evaluates safety data, but not waiting for biofluid analysis results to become available.

   Is the proposed dose escalation schedule and monitoring program adequate?

2. [Preclinical] We propose to conduct GLP toxicology and pharmacokinetic studies in rats, supplemented by non-GLP pharmacokinetic/pharmacodynamic studies in mice.

   Does the agency agree that data from these studies would be appropriate to support the proposed clinical plan?

3. [CMC] We propose to generate Drug Product vials of different sizes, with smaller aliquots used for testing than dosing, to maximize utilization of manufactured drug.

   Does the agency agree that this plan is acceptable?
